### **Election/Restrictions**

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

**Group I:** Claims 1-15, drawn to semiconductor devices, classified in class 257, subclass 315.

**Group II:** Claims 16-59, drawn to methods of manufacturing semiconductor devices, classified in class 438, and subclass 201.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, unpatentabilities of the group I invention would not necessarily imply unpatentability of the group II invention, since the device of the group I invention could be made by other and materially different processes from those of the group II invention. For example, the gate structure of the device in group I can be made by first placing a mask with openings over the semiconductor region to expose portions of the semiconductor, then forming the gate structures in those openings. By performing such process, the gate structures need not to be patterned.

Art Unit: 2818

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, the fields of search are not co-extensive. Therefore, separate examination would be required and restriction for examination purposes as indicated is proper.

4. A telephone call was made to Mr. Stephen B. Ackerman on 03/04/2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

### **Conclusion**

6. A shortened statutory period for response to this action is set to expire 1 (one) month and 0 (zero) day from the day of this letter. Failure to respond within the period for response will cause the application to become abandoned (see M.P.E.P 710.02(b)).
